Abstract (en)

[origin: WO2004031664A1] The invention relates to a housing for gas-treating components, comprising: a body formed by a plurality of panels and provided with a receiving space for the gas-treating components, and at least one feed respectively discharge for gas connecting onto the receiving space. The invention also relates to a panel for use in such a housing. The invention further relates to a method for manufacturing such a housing.
