Abstract (en)
A roof ventilation device is disclosed, comprising a fixed frame, a roof hatch, such as a roof light, which is hingedly connected to the fixed frame and an actuator assembly for opening the roof hatch, as well as the actuator assembly as such. <??>The actuator assembly comprises a lever arm which at a first end is pivotally connected to the roof hatch and drive means arranged on the fixed frame for displacing a second end of the lever arm along a predetermined path substantially in the plane of the fixed frame so as to open the roof hatch. <IMAGE>
