Abstract (en)

A Fresnel/echelon lens (3) is a lens with a negative focal length and consequently it is a biconcave negative lens with a virtual focal point, which can be superimposed with a focal point for a reflector set away from the reflector, especially in a spot position for a spotlight with a Fresnel/echelon lens. Independent claims are also included for the following: (A) A set of lighting equipment having a spotlight with a Fresnel/echelon lens; (B) and for a flashlight with a Fresnel lens spotlight.

Abstract (de)

Um einen Stufenlinsenscheinwerfer mit einstellbarem Öffnungswinkel des austretenden Lichtbündels mit einem, vorzugsweise ellipsoiden Reflektor, einer Lampe und mindestens einer Stufenlinse bereitzustellen, der eine kompaktere Bauform aufweist und somit sowohl platzsparender als auch leichter als die herkömmlichen Stufenlinsenscheinwerfer ist, wird eine Linse mit negativer Brennweite und virtuellem Brennpunkt als Stufenlinse verwendet. <IMAGE>
