Abstract (en)

[origin: EP1548533A2] An apparatus and a method for correcting a position of a mobile robot includes a position notifying means installed at a predetermined position of a specific area, for generating a signal for notifying the predetermined position; a position signal detecting means installed at a predetermined position of the mobile robot, for detecting the position signal; and a control means installed at a predetermined position of the mobile robot, for correcting a position of the mobile robot on the basis of pre-stored position information corresponding to the detected position signal, so that a position error generated when the mobile robot moves can be correctly corrected. <IMAGE>
