Abstract (en)
[origin: EP1548903A1] The device (1) has a belt drive (2) for releasably holding a guide tube (10) to feed wire (3) to several processing stations. A magazine (11) releasably holds at least two guide tubes having different internal diameters. The belt drive is movable relative to the magazine for removing a selected guide tube from the magazine and for inserting the selected guide tube into the magazine. An independent claim is also included for the wire processing method.
