Abstract (en)  
[origin: WO03097009A1] The present invention relates to a formulation for parenteral consisting of a gelling agent or agents, a water miscible solvents and an active agent or agents. The aim of the suspension is to deliver active agent or agents to a subject in the form of a depot that, on administration to the subject, forms a depot. The depot will disperse in time and during this time period, active agent or agents are released into the subject.
