Abstract (en)  
[origin: WO2004034414A1] The invention relates to a navigational button comprising an actuating element which is (1) displaceable at least in two directions and controls said navigation button. The inventive actuating element (1) is arranged in a casing (2, 7) and performs an action on a communication element (3). The inventive limitation element (5,6) is disposed between the actuating element (1) and the casing (2, 7) in such a way that it limits actuation efforts performed on the navigational button.
