Abstract (en)
[origin: WO2004032284A1] The invention relates to an electric contact, especially an electric contact of a plug-in connector, comprising a metal substrate (2) whereon a contact layer (3) is applied in the form of a gradient layer. The gradient layer (3) is made of at least two elements. One of the elements is silver and forms a matrix for the second element, or is alloyed therewith or one of said elements is nickel and the other is phosphorous or one is indium and the other is tin.
