Abstract (en)
[origin: EP1550595A2] The passenger conveying unit (3) enables a person to be conveyed on an aerial cableway in a hang glider-like posture with a free view downwards. The passenger conveying unit is mounted to pivot and rotate relative to the cable (1) of the aerial cableway. The unit has a support element (4) to accommodate the passenger and a safety device (5) for the secure connection of the passenger to the conveying unit. The conveying unit is fixed on a suspension (2) which otherwise serves for the connecting of a aerial cable car or is fixed direct to a cable car.
