Abstract (en)
[origin: GB2390320A] A chisel 1 has a handle 3, a shank 2 and a blade 4 retained on the end of the shank. The shank is formed of reinforced plastics material. One end of the shank is moulded onto the blade, through an interference connection therebetween. On the other end of the shank is formed a spigot 7 for connection to the handle which is moulded thereon from a plastics material. The blade has a plurality of undercut keys 24,25 through which plastics material is moulded during formation of the shank.
