Abstract (en)
[origin: WO2004035346A1] The invention concerns a cup-holder, preferably designed to be integrated in the central console of a motor vehicle, comprising a housing (1) and a tray (2) which is maintained in the housing so as to be insertible therein and removable therefrom, and designed to receive at least one container, such as a cup or bottle. Said cup-holder is designed such that the tray (2) can pivot from a retracted horizontal use position to a more or less vertical non-use position, by countering a resistance.
