Abstract (en)

[origin: EP1552778A2] Urinal device for attaching to a toilet bowl (14) having a toilet seat (26) and/or lid comprises an insert (10) for introducing into the toilet bowl and a lifting system (12) for attaching to the toilet seat and/or lid. When the toilet lid and/or seat are raised, the lifting system lifts the insert at least partly out of the toilet bowl. The insert has a cylindrical or oval-cylindrical body made of a dimensionally stable material that is provided on its upper side with a peripheral collar (18). Preferred Features: In its position of rest the insert is held by the collar on the toilet bowl.
