Abstract (en)

[origin: EP1553524A2] The method involves a first determination step (6.4) in which the sequence of services to be carried out is determined. The first determination step is triggered by a request for a first service by the data processing unit arriving in the data center. The first step involves a first test step (6.6) of checking at least one determination rule in the data processing unit. Independent claims are also included for the following: (A) a data processing system with at least one data processing unit, especially a franking machine (B) and a data center for a data processing system.
