Abstract (en)

[origin: WO2004035277A1] Disclosed is a method for producing colored OSB plates by bringing the wood chips that are used as a basic material for the OSB plates into contact with a liquid colorant preparation prior to and following the drying process, then gluing said wood chips in a conventional manner, pouring the wood chips so as to form three-layered mats, and pressing said mats in a hot state in order to obtain plates comprising a central layer and two coating layers.
