Abstract (en)

[origin: US2006118452A1] A protective case for a blister pack containing medicines, includes a semi-rigid horizontal upper panel having cells delimiting housings open at the bottom and which are obturated by covers with each housing containing medicine. The case includes: perforated horizontal bottom upon which the lower face of the blister pack lays; and a perforated upper panel which covers the upper face of the blister pack; wherein the blister pack is trapped between the bottom and the upper panel each of which includes holes coinciding with the location of the cells, the case having elements for fixing the upper panel with respect to the bottom, and the bottom and the upper panel of the case are made of rigid plastic.
