Abstract (en)

[origin: WO2004001360A1] A pressure sensor housing and assembly is disclosed. The pressure sensor may have a manifold and a header comprising one integral unitary housing. The unitary housing may have a pressure inlet in communication with an elongated tube. The unitary housing also may have a sensing die coupled to the elongated tube in order to receive pressure input signals through the pressure inlet. The sensing die may detect an applied pressure and derive an electrical signal from the applied pressure.
