Abstract (en)

[origin: EP1555232A1] The method involves arranging a new drive (7) outside of an area holding an existing drive (9). The relative situation remains essentially unchanged by block (3) and counterweight (4) to each other. The new drive (7) is placed close to the existing drive and the block (3). The new drive is transported to the highest position (30) and close to the installation place for assembly which is lifted and fastened into place.
