Abstract (en)
[origin: EP1555233A1] An elevator rope is provided with a belt-shaped rope main body. The rope main body has a plurality of strands and a coating body made of a resin for covering and integrating the strands. The strands include a plurality of wires. These wires are laid parallel to each other. The strands are disposed side by side in a cross section perpendicular to a longitudinal direction of the rope main body. <IMAGE>
