Abstract (en)
[origin: EP1555378A2] The door is made from nonmetal materials. The door is made from a group of fiber-reinforced fire protection material and an enclosure element is formed, by timber materials and from a group of fire protection materials. The door (2) further has a fiber-reinforced mineral insulating material core and developed from high-density fiber boards. A recess (15) is lined of fire protection materials to safeguard its functionality. An independent claim is included for a manufacturing method.
