Abstract (en)

[origin: EP1555837A2] Embodiments of the present invention relate to methods, systems, and computer-readable media for mobile device messaging. Mobile device messaging comprises collecting from an originating system information including content data to be sent to the mobile device. One or more short messages are generating for encapsulating the content data. The one or more short messages are formatted to be readable by a web service and the content data is formatted to be readable by the mobile device. The one or more short messages are sent to the web service for delivery to the mobile device.
