Abstract (en)

[origin: WO2004037052A2] The invention relates to a system (2) for separating objects which are disposed on a conveyor belt-type movable support, said system (2) comprising a separator element (3). The invention is characterised in that the aforementioned separator element (3) consists of a tubular bar comprising a longitudinal opening (31) which is used to receive part of an erect panel (5). The invention is further characterised in that the system (2) also comprises two end pieces (4) which are removably fixed to each end of the separator element (3), said end pieces (4) bearing the fixing means (44) which are used to fix the erect panel (5) in the separator bar (3).
