Abstract (en)
[origin: WO2004039712A1] A tape application jig (10) comprising a tape application head (2), a jig guide (3) and a tape holding member consisting of a pair of members (6, 16) combined so as to face each other in vertical direction. The jig guide (3) comprises a guide pin (13) capable of abutting during the movement of the jig guide against the surface of the adherent opposite to the tape applying surface portion.
