Abstract (en)
  [origin: WO2004035523A1] The invention provides cationic cardiolipin compounds, and methods for synthesizing and using them in liposomal formulation, gene transfection, etc. In particular, the invention provides liposomes comprising cationic cardiolipin analog, pharmaceutical compositions comprising cationic cardiolipin analogs, and methods of using such liposomes and compositions, in delivering active pharmaceutical agents to treat human and animal diseases and/or in diagnostic assays.
