Abstract (en)

[origin: EP1557110A1] The device has an applicator nozzle (1) with product distribution orifices (16, 17, 24-26), where each orifice is in fluid communication with one of two compartments (3, 5) containing two hair coloring products. The nozzle has an inner distributor dividing flow of products from the compartments, so that the orifice (16) dispenses a mixture of two products in a proportion different from that of the mixer dispensed by the orifice (17).
