Abstract (en)

[origin: EP1557111A1] The applicator has a container (2) containing cosmetic and/or skin care product. The container has a supply channel (40) for product of an application unit (7). The channel is in communication with the interior of the container when a stopper (10) closes the container and opens directly outside the unit (7). The channel brings the product contained in the container on the external circumference of the unit (7).
