Abstract (en)

[origin: EP1557248A1] For the production of concrete paving stones, a number of selected molds (A-D) are taken from a store (3) and assembled together (6) within a base frame (X), and locked in place by release fittings. Concrete is poured into the molds and, when set, the paving stones are taken from the molds, and the molds are removed (7) from the frame. A computer (4) gives the selection commands (5) for the mold store.
