Abstract (en)

[origin: EP1557363A1] The device has an insertion tube with an opening facing the bag at one end and an outlet opening for the paste material connected to it by a throughflow channel., a blade attached to the insertion tube for perforating the bag with at least one point facing the bag and for cutting the bag with at least one blade connected to the point. The shape of the blade follows the inner wall of the outlet opening for the material contained in the bag. An independent claim is also included a method of manufacturing pre-opened and reclosable bags.
