Abstract (en)

[origin: EP1557370A1] The invention relates to a protective device for drinks cans. The inventive device consists of a thin, deformable discoid body comprising numerous radial notches along the periphery thereof. Internally, the device comprises a series of curvilinear cuts which are concentric with the edge of disk, thereby defining peripheral areas which are intended to be positioned below the upper rim at the top of the cylindrical body of the can. <IMAGE>
