Abstract (en)
[origin: EP1557376A1] The container has an upper edge, a lower edge and a rear with a door and an inliner consisting of at least two stacked layers, whereby an inner layer consists of uncoated, air-transmissive material, an outer layer is coated to be dust tight and to form a moisture barrier and the layers are joined by a special seam implementation so that dust-free ventilation of the joint is only possible via the seam. An independent claim is also included for the following: (A) a method of filling and emptying a container.
