Abstract (en)
[origin: EP1557604A1] A source (4) of light, e.g. an LED, in addition to a luminous device (2) emits a single color so as to alter a light spectrum beamed onto a useful surface (5) through a lighting device (2a) like a halogen metal vapor discharge lamp or sodium discharge lamp with improved color reproduction. An independent claim is also included for a method for illuminating useful surfaces.
