Abstract (en)

[origin: DE10251945B3] Chassis and/or support structure (6) for a motor vehicle (19), especially a car, comprises a hollow chamber plate structure designed as a channel system for aeration/ventilation of a passenger compartment. Preferred Features: In the case of a twin- or multi-axle motor vehicle, vertical flank-side hollow chamber plates (4) adjoin in the region of the axles a base-side hollow chamber plate (1) arranged between the axles. The hollow chamber plates are made of light metal elements or plastic elements by extrusion.
