Abstract (en)
[origin: WO2004035552A1] The invention relates to novel derivatives having general formula (I), wherein R1 represents an amino or hydroxyl group, R2 represents hydrogen or a methyl radical, R3 represents hydrogen or a fluorine atom and A represents: group a, formula (II), wherein n represents an integer from 5 to 11, inclusive, R4, R5, which can be identical or different, represent independently of one another hydrogen or a fluorine atom; group b, formula (III), wherein n, R4, R5 have the same meaning as above. The invention also relates to the pharmaceutical compositions containing at least one of the aforementioned compounds by way of an active principle and to the use of said derivatives for the production of medicaments which are intended for the treatment of hypercholesterolaemia or atherosclerosis.
