Abstract (en)

[origin: WO2004042154A1] A jet regulator (1) has a jet regulator housing (2), which can be inserted into a plumbing spout fitting, and has at least one circular seal (6) placed on the jet regulator housing (2). Said seal effects a sealing between the jet regulator housing (2) on one side and the spout fitting on the other. The jet regulator (1) also comprises a component, which is located on the inflow side, extends over the clear spout opening, and which is joined while forming one piece to at least one seal that effects a sealing between the jet regulator housing (2) and the spout fitting.
