Abstract (en)
[origin: WO03104577A1] The present invention relates to a building element (1) made of masonry blocks (2), to which element means (7) for hoisting said element are associated. Said means include bars (6) which extend vertically through said masonry blocks and which are arranged in respective channels (5) arranged in superimposed masonry blocks, so that each bar (6) by means of a grouting compound is attached to each superimposed masonry block (2, 2a). The present invention also relates to a method for the production of a prefabricated building element (1) by means of bricklaying.
