Abstract (en)  
[origin: WO2004036292A2] Embodiments of the present invention relate to a floor display system with variable image orientation. Embodiments may further relate to networked data distribution and management; interactivity; image-enhancing optics; controlled audio; a protective covering; an anti-slip feature; fragrance technology; theft prevention; deployment in a track-and-trench system; specialized positioning mechanisms; and lightweight, flexible implementations.
