Abstract (en)

[origin: EP1559344A1] The bottle holder has several sockets (2) in a row for storing horizontal bottles. Some of the sockets are able to fold down so that they move into a different angular position to hold the bottles slightly inclined. The fold-down sockets can be set in a transverse strip (6) mounted at the front of the bottle holder to serve as a support for the inclined bottles. Independent claims describe use as wine store and refrigerated cabinet with same.
