Abstract (en)
The invention relates to a fairground attraction (1;101) comprising a base (2), a main carrier (3) suspended from the base (2) for rotation about a vertical first axis (A1) and a number of person carriers (5) suspended from the main carrier (3) at a distance from the first axis (A1) for rotation about vertical second axes (A2). The second axes (A2) can herein each enclose an angle (α) with the first axis (A1). The person carriers (5) can further be suspended from the main carrier (3) via a number of auxiliary carriers (4) which are suspended from the main carrier (3) at a distance from the first axis (A1) for rotation about a vertical third axis (A3). In this case the person carriers (5) are suspended from the auxiliary carrier (4) at a distance from the third axis (A3) for rotation about the second axes (A2). <IMAGE>
