Abstract (en)

[origin: EP1559674A1] The filling machine has a device (17) close the filling elements (4, 4a) and to form a machine flow path for the hot fluid including the filling elements and their fluid channels (5, 5a). A flow path for the hot fluid is formed between the fluid supply source (7) and a fluid sump (15). This may be in the form of an auxiliary storage tank.
