Abstract (en)  
[origin: EP1560232A2] The device (1) has a control module (60) and output electronics (70) for functional testing of rod ignition coils (20) for connection to a diagnostic tester, whereby the ignition coil has a primary winding (21) and a secondary winding (22) for generating the ignition voltage and a field guide plate (24) has a connecting plug (23) and a secondary output (25). The device has a housing and a plug mandrel (10) for accepting the ignition coil whose dimensions and shape correspond and/or can be adapted essentially to those of a plug mandrel in an internal combustion engine.
