Abstract (en)
[origin: WO2004041497A2] A method of manufacturing a weather strip 10 includes forming a compressible bulb member 12 having a hollow interior 14. A liquid thermoplastic material 34, such as a hot melt material, is injected into the hollow interior 14. The thermoplastic material 34 cures into a resilient plug 40 to provide reinforcement to one or more locations along the length of the weather strip 10.
