Abstract (en)
[origin: WO2004042125A1] The invention relates to a top comb (1) for a textile combing machine, whereby the top comb (1) comprises a top comb plate (2), on the base body of which a pin stripe (3) may be fixed. A retaining section (15) is embodied on the upper face of the base body (18), by means of which the top comb (1) may be fixed thereto with a retainer clamp (9) of a corresponding top comb holder (7). According to the invention, a wear protector is arranged between top comb (1) and top comb holder (7), in particular a plastic with good stability and good surface friction properties.
