Abstract (en)
[origin: US2005115174A1] Separating wall made of glass with frameless side parts which are held at the base and at a top structure, at least one frameless transom which is held at the two side parts and at the top structure, and at least one leaf which is rotatably arranged below the transom and between the two side parts. The leaf is rotatably supported exclusively at the transom and at the base by means of fitting parts, and the transom and the side parts are fastened to one another and to the top structure and the base without the fittings.
