Abstract (en)
[origin: WO2004042258A1] The invention relates to a motor vehicle drive device comprising an electric motor (8) for driving an oil pump (6) in an air chamber (68) of a housing by means of a rotor disk (10) of the rotor (11) of the electric motor, said rotor being permanently connected to the pump rotor (7) of the oil pump. A single free-wheel clutch (66) can also be provided for mechanically driving the pump rotor (7) of the oil pump (6) by means of the drive train (36).
