Abstract (en)

The cap has a skull-cap (10) equipped with a fixed visor (11). Three movable visors (14) are mounted in respective planes situated below the fixed visor and rotate around a geometric axis (AA) passing through the top of the skull-cap. Three partial skull-caps (13) are assembled in the skull-cap by using a detachable press-button type connection unit (17) that passes freely through holes (15).

Abstract (fr)

L'invention concerne une casquette comportant une calotte entière (10) munie d'une visière fixe (11) et trois visières additionnelles (14) montées mobiles en rotation dans des plans respectifs situés sous la visière fixe et sensiblement parallèles à elle, autour d'un axe géométrique passant par le sommet de la calotte. <IMAGE>
