Abstract (en)

[origin: EP1561682A2] Liquid-gas separating vacuum effluent collecting system comprises a vacuum producing unit formed as a pump connected to a vacuum tube system, an ejector-pump combination, gas-air pump or vacuum container with evacuating pump. The effluent is separated into a gas-air component and a liquid component within the system. Preferred Features: The gas-air mixture and the liquid are further transported into separated pipelines.
