Abstract (en)  
A container (1) comprises a container neck (3) with an opening (5) at the end of said neck (3) and a cap (4) which serves to close said opening (5).  
<??>The neck comprises breakage means (7) which causes at least parts of the neck (3) to break off if the cap (4) is removed from said container (1). <??>Tamper-evidence is shown on the neck of the container, as the neck breaks off at the breakage means if force is applied to remove the cap.
