Abstract (en)

[origin: EP1561868A2] Run-off arrangement comprises a collector (8) built into a base of a room, and connecting units for forming a sealing connection of a run-off element with the collector. Preferred Features: The run-off element is formed as a support (10) or as an opening similar to a bushing. The connecting units have a flexible lip seal (12) for sealing the connection between the run-off pot (1, 2) and collector. The lip seal is eccentric.
