Abstract (en)
[origin: EP1561895A2] The bar consists of a first metal tube (1), realized in 100CR6, steel or similar, on the outside wall (2) of which is made a temper for superficial hardening. Into said tube is coaxially put a second tube (4) with hole or cavity (5) for all its length in which is put a cable (6). Inside said tube (4), spaced to a space (7), is put a full tungsten carbide cylinder (8).
