Abstract (en)  
[origin: EP1562003A2] Flue head-piece for airing and venting ducts, formed by two single pieces and in particular by a first bottom piece (A) with a bush (1, 1') designed at the bottom for connection to the venting duct (E) and designed at the top for rapid and if necessary releasable connection, for example by means of snap engagement, to the second top piece (C) which comprises a collar (9) provided as one piece with lugs (10, 110) directed upwards and integral with the covering cap (11), the said two pieces (A, C) being designed in any way so that between them there may be removably housed an optional third piece (B) consisting of a disk-shaped screen for protection against the entry of insects or other small foreign bodies.
