Abstract (en)
[origin: US2006126974A1] At least one insert (6) for insertion into a bag (3) for receiving a discrete article, said insert (6) being preferably located in a portion of the bag taking up substantially the main load of the discrete article and being moveable relative to the bag, securable to the bag and removable from the bag. The invention also includes a device for storing and transporting discrete articles, having at least one bag (3) in which the discrete article can be received, wherein it comprises at least one insert (6), as described above, in the region of the bag (3) taking up substantially the main load of the discrete article, said insert being movable relative to the bag and detachably secured to the bag (3).
